

Enabling ID verification using Skype .

Enable Caller ID on your Skype to match the phone number of your smart-phone.
Start Skype Video call.

Taking a video snapshot of another person

To take a video snapshot of another person:

1. [Make a video call](#).
2. During the video call, at the top of the calling area click **Snapshot**.
3. The **Snapshots gallery** opens.

Use the left and right buttons to browse other video snapshots you have taken, or click **Gallery** to view a list of all your video snapshots.

To view your video snapshot files in Windows Explorer, click **Locate**.

Start Identity Verification:

- Ask the person for his PIN .
- Open SentryCom browser page.
- Enter person's Skype username and PIN.
- Provide the person with session pass-phrase.
- Transfer a Skype (audio) call to SentryCom Identity Verification number on skype.
- After successful ID Verification - person's ID (driver's licence with picture) will be displayed.
- Compare it with Snapshot Gallery.
- Call person's Skype to resume conversation.
- Prompt him for session pass-phrase. Resume session.

Real-time identity credentials : comprising Skype username , PIN , Voice Biometrics (Optional) and Face Biometrics (Manual).
